

Multi-Function Manned, Unmanned Solutions

UUV Launch & Recovery

Special Operations

Interdiction

Counter-Terrorism

Mine Warfare

Tracking & Surveillance

Night Cat Manned, Unmanned Surface Vessel

IBC Offshore applies a technologically advanced hull design “Twin V Technology” to perform multi-function missions including launch and retrieval of Unmanned Underwater Vehicles (UUVs), Mine-Sweeping and Special Operations. Utilizing a high speed, high efficiency boat hull with a full beam, multiple lifting strakes and unique keel step pad which allows the hull to remain in contact with the water while maneuvering, even in rough sea conditions, the platform is multi-function capable.

- ✓ Reduced shock and vibration for increase operability of installed equipment and systems
- ✓ Unique lifting strakes create less drag and allow higher speeds with less horsepower
- ✓ Lightweight 600HP Innovation Diesels with efficient fuel usage and greater range.
- ✓ Meets size and weight constraints full load with fuel for US ships including LCS
- ✓ Platforms range from 27-feet to at least 42-feet.
